## SELECTMEN'S REPORT.

---

In the foregoing report will be found the financial transactions of the selectmen for the past official year, which is respectfully submitted to the inhabitants of the town of Alton. The money invested in the two road machines was in our opinion sufficient to warrant the erection of a building to house them in, costing \$267. There were two petitions brought before the board for new highways, which were in their judgment needed to accommodate the public, and were accordingly laid out, one being completed and the contractor for the other settled with, a sufficient part of the contract price being retained to complete the road, the one at the south part of the town costing \$110, including land damage, and that on the mountain \$2,540. It will be seen from the above report that the cost of the store house and new highways would have paid the total debt and left a small sum in the treasury.

Six of the above 15 scholars belong to Alton, and 9 belong to Gilford.

We have united the schools, as far as practicable, without moving schoolhouses, thereby reducing the number of schools from nineteen to twelve. By moving two schoolhouses, the number of schools would then be reduced to ten, and the change would necessitate only a small expense in conveying scholars to and from the schools. By this arrangement, not more than twelve scholars would have to be conveyed over two miles. If the number of schools were reduced to ten, each school would then have at least twenty-six weeks of instruction. The object of the School Board is to unite those schools which are near one another, and thereby reduce the number of schools from twenty to ten and the number of teachers from twenty to ten. With this policy, it is plain to be seen that there will be a larger number of week's instruction, and the teachers will receive a larger compensation; and yet no greater amount of money need to be expended, nor need any school contain too many scholars. In some of our schools we have seven scholars, and in others, nine. Where they are near enough such schools ought to be united and thereby save the expense of two teachers. During the past year we have paid our teachers from two to five dollars more each month than has been paid in any previous year, and the scholars have been taught from three to four weeks longer.

Respectfully submitted,

DAVID H. MORRISON,	}	Board of Education.
